Terms
This list cancels all previous offers.
Prices quoted in this catalogue are net, and subject to no discounts. My prices are as low as goods of a like quality can be furnished by any responsible firm. Quality should always be considered as well as prices.
All Goods are offered subject to being unsold on receipt of order. Early Ordering is always advisable and often saves many disappointments. Please give shipping directions and write your name and address distinctly.
Cash, or satisfactory references must accompany orders.
C. O. D. Orders can be sent only by express. Such orders must be accompanied by a remittance in part payment to guarantee charges.
No Order for plants amounting to less than $1 will be filled, except an extra charge for packing be allowed; packing charges are made at actual cost.
Substitute. We do not substitute on plants unless specially authorized to do so. As the season advances, it is always possible that some stocks "run out" and we may be unable to procure them.
Risk. All goods are sent at purchaser’s risk. After they are delivered to forwarding companies, and we have their receipt for shipment, our responsibility ceases.
Errors. Keep a copy of your order. We aim to have each order filled correctly. When we are at fault we will make satisfactory correction.
Non-Warranty. Only the best and healthy plants will be shipped, but we cannot give any warranty as to description, product, or anything else, as conditions always exist which we cannot control.
Introduction

AGAIN I take pleasure in submitting to the nature-loving public the Fourth Edition of my complete descriptive list of choicest, most valuable and interesting hardy and other plants and flowers for the beautifying of homes and home grounds.

First of all, I desire to express my deepest appreciation to all my patrons who in the past have entrusted their orders to me and thus enabled me to increase my business and also my ability to serve them. I shall ever endeavor to have my stock of such high quality as to merit their continued confidence.

I have been growing perennials successfully for many years and am continually endeavoring to procure new varieties. These are put on the market only after I am fully satisfied with their cultivation. They are all grown here in Madison, and only the most attractive and suitable for each purpose are propagated.

Annuals and Bedding Plants

I grow a most complete collection of annuals and am able to supply plants of all summer varieties in the spring, as long as they last, for the lowest market prices.

Among them are—Ageratum, Begonia, Calendula, Centaurea, Chinese Asters, Chrysanthemum, Cosmos, Geranium, Heliotrope, Lantana, Lobelia, Lemon Verbena (Aloysia), Marguerites, Marigold (tall and low, or French), Salpiglossis, Salvia, Scabiosa, Summer Ivy, Verbenia, Vinca variegata from pots, Zinnia in colors or mixed, and many others.

All Bedding Plants here mentioned and those not mentioned have been at least once transplanted and grown in coldframes to insure their hardiness.

Landscape Work

Back of this are not only 36 years of experience in laying out and remodeling of estates in America, as well as abroad, but many awards for garden models at different exhibitions. We were awarded two first prizes for miniature models at the First International Flower Show, Grand Central Palace, New York City, 1913.

Cut-Flowers

All through the season you will find a large assortment of flowers suitable for cut-flowers. Many of them are from very rare varieties. Try some. Prices moderate.

Besides the plants and varieties mentioned in this catalogue, I am trying out many others for hardiness and other merits.

As we are growing the most complete collection of old-fashioned flowers in the United States, we might be able to furnish you some old, rare favorites you are anxious to obtain. Kindly let me know your wishes, giving some indication of your requirements; I may be of some help in the arrangement of your "Pleasure Ground," and have the desired plants for you.

LOCATION. Our Nursery is located on main Boston Post Road 1½ miles east of Madison, or 3 miles west of Clinton, on the edge of State Park (Shore).

VISITORS. I am always glad to welcome visitors who are interested in hardy plants. The flowering season starts with the opening of spring and continues until late fall, when a strong frost generally destroys the last of the very late-flowering plants.

FRANK JOSIFKO, Madison, Conn.
